

STRECH CEILING

Technical Info:

Fire Resistance: It does not catch fire, no droplets are seen that ignite and spill onto the floor. Classification M1 (France) and B1 (Germany).

Vapor Permeability: Relative Humidity %65 RH = 0.0030 gr/hr m² mm Hg
Relative Humidity %65 RH = 0.0045 gr/hr m² mm Hg

Heat "K" Coefficient: K = 0.785 ; With 3 cm air + 4.5 cm rock wool insulation

Color: DIN 67 530

Measures: Lacquer & | thickness 0.18 mm according to DIN EN ISO 2286-3.
Transparent | weight 240 gr/m² according to ISO 2286-2.

Suede | 0.36 mm according to DIN EN ISO 2286-3.
weight 360 gr/m² according to ISO 2286-2.

Specification:

Made of high quality PVC materials, The fabric is flexible and durable in structure.

Due to its easy application, Ankara Panel Stretch Ceiling Systems can be applied in all areas of life.
